VERIFIED END-TO-END TEST SPECIFICATION

EVENT INTELLIGENCE OS

Complete step-by-step verification guide for Admin OS, Jury Pad, Participant Hub, Digital Gate Pass, and Expo Visitor Portal.

🔑 Quick Access & Test Credentials

ROLE	PORTAL ROUTE	LOGIN / ACCESS CODE	KEY ACTIONS TO TEST
Admin	/console	alex.chen@innovateos.io / admin123	Master mission control, event creator, judge onboarding, certs
Judge	/judge	JUDGE-WK8U (Dr. Ananya Sharma)	4-criteria rubric, weighted scores, fair-scoring engine
Team	/participant	rohan.patel@example.com / pass123	Booth pass QR, direct file upload, real-time jury status
Visitor	/gate & /p/[code]	Common Gate QR Code	Fast gate check-in, crowd voting, 5-star review submission
Gate Staff	/checkin	Venue Entry Terminal	Scan attendee pass QR code with audio check-in verification

📋 Step-by-Step Testing Workflow

Step 1: Admin Mission Control & Event Setup

http://localhost:3000/console

Verify that administrator privileges protect master event controls.

1. Go to /login and sign in with Admin credentials (alex.chen@innovateos.io / admin123).
2. Open /console. Verify that non-admin roles are restricted and redirected.
3. Click **Judges + AI** tab ➔ Click **+ Onboard Judge**.
4. Enter Name: *Dr. Rajesh Sen*, Org: *Venture Scout* ➔ Generate official code.
5. Click **Visitors** tab ➔ Inspect the **Common Venue Gate QR Code**.

Step 2: Participant Project Submission (File Upload)

`http://localhost:3000/register`

Test submitting a project with the new drag-and-drop file uploader and event picker.

1. Open `/register` and switch to the **Participant / Team** tab.
2. **Event Selector:** Pick your event (e.g. *TechNova Expo 2026*).
3. **Direct File Upload:** Click the banner upload box and select any image file (PNG/JPG). Notice the instant canvas-compressed preview thumbnail.
4. Enter Title: `AgroSense Drone`, Track: `IoT`, Team: `SkyBots`, Lead: `Pooja Sharma`.
5. Click **Submit Project**. System generates booth code (e.g., `PRJ-XYZ123`) and booth location (`B-12`).

Step 3: Team Dashboard & Digital Booth Pass

`http://localhost:3000/participant`

Inspect booth pass QR code, live showcase card, and judge evaluation tracker.

1. Verify the **Booth Digital Pass & QR Code** displayed in the right column.
2. Verify the **Judges Evaluated Counter:** Accurately reflects only real assigned judges (e.g. `0 / 1 Evaluated`) with no fake demo judges.
3. Verify the **Uploaded Banner Image** renders in high resolution on the preview card.

Step 4: Grand Jury Evaluation Pad

`http://localhost:3000/judge?code=JUDGE-WK8U`

Evaluate assigned projects with multi-criteria rubric and fair-scoring distribution.

1. Log in with Code: `JUDGE-WK8U` (Dr. Ananya Sharma).
2. Notice the header: `Jury Portal: Dr. Ananya Sharma [TechNova Expo 2026]`.
3. **Strict Event Isolation:** Switcher shows only onboarded judges for this event; demo judges from other events are completely excluded.
4. Select `JalRakshak AI` from the left project column.
5. Set scores: Innovation (9), Execution (8), Impact (9), Pitch (8) = **34/40**.
6. Click **Submit Score as Dr. Ananya** ➔ Score is recorded and synchronized live.

Step 5: Venue Gate Admission & QR Scanning

`http://localhost:3000/gate & /checkin`

Paperless attendee arrival and high-speed venue check-in.

1. Open `/gate`. Enter Name (`Karan Verma`) and Email (`karan@example.com`).
2. Click **Issue Official Digital Gate Pass** ➔ Generates digital pass with code `VIS-10023`.
3. Open Gate Scanner at `/checkin` ➔ Type `VIS-10023` (or scan QR code) ➔ Displays verified admission timestamp with green checkmark.

Step 6: Crowd Prize Voting & Attendee Reviews

`http://localhost:3000/p/PRJ-NS8SAK`

Verify that crowd voting is strictly reserved for attendees and test visitor reviews.

1. Open Project Profile: `/p/PRJ-NS8SAK` (JalRakshak AI).
2. **Role-Based Voting Restriction:** If signed in as team participant, voting is disabled with the warning: *"Participants cannot vote (reserved for visitors)"*.
3. As a visitor: Click **Vote for crowd prize** ➔ Counter increments and turns into `Voted · X`.
4. Under **Leave a Review**: Select 5 Stars ⭐ ⭐ ⭐ ⭐ ⭐, enter comment: *"Outstanding hardware demo!"* ➔ Review appears instantly in the live feed.

Step 7: Certificate Studio

`http://localhost:3000/certificates`

Generate verifiable digital awards with cryptographic verification codes.

1. Open `/certificates` ➔ Select recipient and award tier (e.g. *1st Place Grand Winner*).
2. Click **Generate Certificate** ➔ Produces official certificate with verification hash.
3. Verify cryptographic authenticity at `/verify/[code]`.

Cloud Database Connectivity: Powered by Supabase PostgreSQL (`aws-0-ap-south-1.pooler.supabase.com:5432`) with connection pooling and memory fallback.
